### **TenCate Geosynthetics Releases New Booklet on Reinforced Soil Case Studies**

TenCate Geosynthetics is excited to launch the release of a new and updated version of the popular Reinforced Soil Case Studies booklet.

Over the last 45 years, TenCate Geosynthetics has been involved in many reinforced soil applications, in many parts of the world. The selection of the case studies contained in this booklet give an appreciation of the diverse range of reinforced soil applications where TenCate reinforcement geosynthetics have been used. New reinforced soil applications are continually evolving, bringing forth innovative and value-engineered solutions.

This comprehensive booklet features notable and outstanding case studies from around the globe, showcasing complex applications and practical solutions in basal reinforced embankments on soft soil, piles and spanning voids, reinforced soft site closures and reinforced soil walls - an extensive compilation of applications knowledge, expertise and experience from the world leader in geosynthetics.

Read all about it in our digital flipbook <https://www.tencategeo.asia/en-as/resources/new-release>
